+1 (647) 861-9071

Mississauga, ON, Canada

Education

University of Waterloo

Bachelor of Mathematics in Computational Mathematics, Minor in Computing

Waterloo, ON

2020 – 2025

Professional Experience

Kindr

Founding Software Engineer

Calgary, AB (Remote)

Apr 2025 – Jun 2026

- Owned full stack development (React, Vite, TypeScript, FastAPI) of a healthcare platform serving 61+ dental clinics.
- Built the frontend in React/TypeScript with Vite, powering clinic-facing dashboards and patient intake workflows.
- Built healthcare voice AI agents (Ultravox, Rime TTS) handling 300+ calls and 500+ insurance inputs per clinic monthly.
- Designed AI orchestration with RAG pipelines and multi-provider LLM load balancing, cutting latency by 40%.
- Led migration to open-source models (DeepSeek GLM), cutting inference costs by 60% and eliminating vendor lock-in.
- Shipped versioned FastAPI microservices with auth, validation, and instrumentation for weekly zero-downtime releases.
- Managed Alembic code-first migrations and query tuning, reducing average query time by 45% in production.
- Improved reliability with Redis caching (3x faster reads) and Kafka event streaming in two-week Agile sprints.
- Established observability (Application Insights, alerting), Playwright E2E testing, reducing production bugs by 50%.
- Wrote technical documentation, participated in QA testing and peer code reviews across all software releases.

PickUpESports

Founder & Software Engineer

Waterloo, ON

2025 – Present

- Building a full-stack esports platform (React/Vite, FastAPI, PostgreSQL, Alembic) deployed on AWS.
- Designed relational data models for events, participants, and venues; built RESTful APIs for booking and scheduling.

CrackInterview

Backend Developer Intern

Toronto, ON

Jul 2024 – Oct 2024

- Trained and deployed an AI chatbot (DialogPT, PyTorch), boosting Tier-1 support throughput 30% with 95% accuracy.
- Engineered a real-time peer-to-peer chat application using WebSockets and asyncio, supporting 500+ concurrent users.
- Integrated video conferencing (WebRTC, SocketIO, PeerJS, TURN servers) on AWS, increasing engagement by 25%.

Replic

Junior Full Stack Developer

Waterloo, ON

Jul 2021 – May 2022

- Implemented backend controller logic for an ASP.NET MVC web application, achieving a 20% performance boost.
- Designed core functionalities using UML diagrams and RESTful APIs, supporting XML and SOAP data exchange.
- Delivered full-stack solutions with MSSQL, C#, and AWS RDS; added automated testing and CI/CD, cutting bugs 30%.

Trillium Health Partners (Credit Valley Hospital)

Junior Software Engineer, Business Intelligence

Mississauga, ON

Aug 2019 – Feb 2020

- Designed a network-wide Priority Tracking Tool for 1.75M+ annual patient visits, improving efficiency by 35%.
- Developed enterprise-grade web applications and interactive dashboards using SQL, Oracle, and .NET frameworks.
- Collaborated with Agile teams to create design documents, flow diagrams, and specs aligned with business strategy.
- Delivered solutions using ASP.NET, MSSQL, and C# with continued daily usage across THP hospitals in the GTA.

Genesis GenAI Hackathon

AI/ML Mentor

Toronto, ON

Mar 2024

- Selected best mentor of 1,200+ applicants; mentored 300 students on API integration, debugging, and ML techniques.

Technical Skills

- Languages:** Python, JavaScript/TypeScript, SQL (PostgreSQL, T-SQL, Oracle SQL), C#, C++
- Frontend:** React, Vite, Tailwind CSS, responsive design, component-based architecture
- Backend:** FastAPI, REST APIs, microservices, Docker, Kubernetes, Redis, Kafka, WebSockets, asyncio, Terraform, Alembic
- AI/ML:** LLM integration (OpenAI, Claude, DeepSeek), RAG pipelines, AI orchestration, Ultravox, LiveKit, Rime TTS, PyTorch
- Cloud & Practices:** Azure (App Service, SQL, Functions), AWS (EC2, RDS, Lambda, S3), CI/CD, TDD, unit/integration testing, distributed systems, system design, Agile/Scrum, QA testing, Playwright, Git
